

## **JD 2: DevOps Engineer – Cloud Automation**

**Title:** DevOps Engineer

**Location:** Remote

**Type:** Full-time

**Experience:** 4–6 Years

### **Job Summary:**

Looking for a proactive DevOps Engineer to automate cloud infrastructure, streamline CI/CD pipelines, and enhance deployment reliability in a fast-paced SaaS environment.

### **Key Responsibilities:**

- Manage and automate infrastructure using tools like Terraform and Ansible.
- Create CI/CD pipelines using GitLab CI or GitHub Actions.
- Monitor cloud infrastructure (AWS or Azure) using Prometheus, Grafana, and CloudWatch.
- Collaborate with developers to containerize applications using Docker and deploy via Kubernetes.
- Drive automation for security, compliance, and scalability.

### **Required Skills:**

- Hands-on with Docker, Kubernetes, and Helm.
- Experience in setting up Infrastructure-as-Code (IaC) with Terraform.
- Working knowledge of at least one public cloud (AWS/Azure).
- Familiarity with logging and monitoring tools like ELK, Prometheus, etc.

### **Preferred Certifications:**

- AWS Certified DevOps Engineer – Professional
- Microsoft Certified: DevOps Engineer Expert
